

# **Tropical Storm/Hurricane Update**

As of 1:30 PM (CST) on October 5, 2017, Okaloosa County Emergency Operations Center will not activate unless a significant change in course is indicated for the soon to be named Tropical Storm Nate. The current path takes it somewhere near the Mississippi/Louisiana state line. Okaloosa Island Fire has implemented their internal hurricane plan and will be monitoring the storm as it progresses. Please consider and VOLUNTARY EVACUATION of Okaloosa Island and low-lying areas should any shift in the storm or increase in intensity occur. Please follow weather updates on television, radio and internet for current and future weather conditions. This website WILL NOT be able to stay up-to-date during the next few days as we do use our own in-house web management. If there are any emergencies, please contact 9-1-1 and we will respond accordingly.

Thank you and as always, be safe.

Okaloosa Island Fire District
